EXAM 6

91 Question

Physiology:

1-One of the following increase central venous pressure?

a. decrease cardiac output
b. increase heart rate
c. increase total peripheral resistance
d. hypovolemia
e. dehydration

2-The following cause hyperkalemia?

a. exercise
b. insulin injection
c. high level aldestrone
d. inhalation of beta 2 agonist

3-Eldery patient bed ridden his serum sodium 154mmol and hematocrit of 50% this patient is most likely?

a. dehydration
b. overhydration
c. hyper osmolar coma
d. renal failure
e. DKA

4-The ventricular filling associated with delay in?

a. SA node
b. atrial muscle
c. AV node
d. interventricular fiber
e. perkinj fiber

5-Patient with high level of TSH and TRH. And increase in HR. this goiter is caused by?

a. pituitary tumor secreating TSH
b. hypothalamic tumor secreting TRH
c. Graves disease
d. Hashimoto thyroiditis
e. Hypothyrodism

6-Female presented with amenorrhea . serum analysis show low progesterone level , what is most explanation of her condition?

a. low LH
b. high estrogen
c. no corpus lutium
d. low growth hormone
e. low prolactine

7-Milk synthesis inhibited during pregnancy due to

a. high estrogen level
b. High estrogen and progesterone level
c. high progesterone level
d. high dopamine during pregnancy
e. high gonadotropin

8-Sympathetic stimulation of whitch the following vascular bed with produce maximum increase in prepheral resistance?

a. vein
b. venules
c. Arterioles
d. capillary
e. Artery

9-In ECG which lead reflected the inferior MI of heart?

a. V1,V2
b. V3,V4
c. aVR
d. I,Avl
e. II,III,Avf

10-The chemoreceptors are found in?

a. the lung
b. glomus bodies
c. Aortic arch
d. cardiac sinus
e. medulla

11-30 yrs old man with small bowel obstruction on nasogastric tube suction for 3days .one of the following is ametabolic abnormality is likely to develop in this patient?

a. metabolic alkalosis
b. mixed acidosis
c. metabolic acidosis
d. respiratory acidosis
e. mixedacidosis

12-40 yrs old man , known case of chronic renal failure on regular dialysis , skip three setion . one of the following is true about his acid base

status(PH:7.35-7.45,,,Hco3:22-26,,,Pco2:35-45)?

a. PH:7.54 CO2:35mmhg Hco3:19mmhg
b. PH:7.45 CO2:45mmhg Hco3:24mmhg
c. PH:7.27 CO2:34mmhg Hco3:19mmhg
d. PH:7.27 CO2:60mmhg Hco3:28mmhg
e. PH:7.55 COP2:55mmhg Hco3:32mmgh

13-PR interval in ECG equal?

a. (0.12-O.2S)
b. (0.12-0.20S)
c. (0.1-0.2 S)
d. (0.43-0.45 S)
e. (0.2-0.3 S)

14-Granulosa cells produce which of the following hormone at the time of pre-ovulation?

a. LH
b. FSH
c. estrogen
d. progesterone
e. HCG

15-An atheletes 40yrs female used to take anabolic steroid containing testosterone presented with amenorrhea for 3months. Testosterone cause amenorrhea by which of following mechanism?

a. reduce the sensitivity of endometrium to estrogen
b. stimulate LHandFSH release from anterior pituitary gland
c. reduce LH and FSH production by the anterior pituitary
d. reduce gonadotrophine releasing hormone by the hypothamus
e. increase inhibin secretion by the corpus lutium

16-In ECG , the QRS wave is due to:

a. A: atrial contraction
b. B: atrial depolarization
c. C: perkinje fibers excitation
d. D: ventricular depolarization
e. E: ventricular contraction

Pathology & immunology

1-Which the following is the cause of severe tissue injury in patient with hypersensitivity reaction type 2:

a. phagocytosis by immunoglobulin A
b. opsoniation by immunoglobulin G
c. production of antibodies by plasma cell
d. Membrane attack complex(MAC)
e. ADCC-K-Cell

2-Whith the following graft is most clinincally applicable?

a. autograft
b. isograft
c. allograft
d. xyngraft

3-One of the following is true about the natural killer cell?

a. large granules lymphocyte
b. responsible for humeral immunity
c. is a T-helper

4-The following immunoglobulin is found in mucosa?

a. IgG
b. IgM
c. IgA
d. IgD
e. IgE

5-One of the following caused by Epstein bar virus?

a. tumor of the nasal cavity
b. chronic lymphocytic leukemia
c. Hodgkin lymphoma
d. non Hodgkin lymphoma

6-Which the following cause caseating granuloma?

a. Sarcoidosis
b. histoplasmosis
c. cat scratch disease
d. toxoplasmosis
e. shistosomiasis

7-Pure hyperplasia is seen in which of the following condition?

a. as compensation in the kidney after unilateral nephroctomy
b. in bone marrow of hypoxic patient
c. breast in pregnant lady
d. skeletal muscle during exercise
e. acromegaly

8-Which of the following mediator is likely to cause pain and fever?

a. bradykinin
b. prostaglandins
c. Il-1
d. leuckotrien

9-Which of the following is true about reversible cell injury?

a. cell membrane fragmentation
b. clumping of chromatin
c. chromatin condensation
d. mitochondrial swelling
e. loss of ribosome

10-Amyloidosis is best described by?

a. deposition of protein in extracellular matrix
b. intracellular deposition of pigment
c. protein production by the liver

11-Autoimmune disease common in ?

a. Male
b. Female
c. all above

12-The following is not true about free radicals?

a. enzymatic denaturation
b. may cause uncontrolled growth of cells
c. may cause vascular degeneration

13-Which the following true about interleukin-1?

a. A: cause fever
b. B :cause pain
c. C :Cause pain and fever

14-Interleukine-1 cause fever by act on?

a. thalamus
b. hypothalamus

15- female lady on her postpartum period develop mild cough following coma . brought by her husband ,furthermore at the casualty she develop attack of convulsion what is the most likely cause her condition?

a. intracranial hemorrhage
b. amniotic fluid embolism
c. epilepsy
d. pulmonary edema
e. pulmonary thromboembolism

16-Old man known adenocarcinoma .the malignancy acquired se of mutation that cause which of the following behavior?

a. increase cell-cell adhestion
b. increase susceptibility to apoptosis
c. loss of cell cycle point control
d. Enhance stem cell differentiation
e. decreased cellular motility

17-P53

a. Tumour suppressor
b. Tumour enhancer
c. tumour marker
d. non above

<u>Biochemistrty&genetic</u>

1-Beriberi?

a. is not common in alcoholics
b. the deficient vitamin never affect the brain
c. the deficiency of riboflavin
d. affect the nerves and the heart
e. is the combination of diarrhea ,dementia, dermatitis

2-Synthetic nucleotide analogs?

a. can inhibit DNA synthesis
b. Are always modified purine nucleotides
c. lack phosphate group
d. allow replicaton to proceed at faster rate
e. they cause denaturation of DNA

3-Nucleosome?

a. contain negatively changed protein

b. is coiling of each single strand of DNA and histone
c. is association of each DnA and arginine rich protein
d. is combination of DNA and chromatin
e. is association of DNA, RNA ,and non histone protein

4-The main source of energy in cardiac muscle?

a. fat
b. carbohydrate
c. ketone
d. protein
e. Amino acid

5-Pyruvate carboxylase?

a. converts acetyl COA to pyruvate
b. require carnitine
c. converts pyruvate to oxaloacetate
d. is activated by high fructose 1,6 biphosphate
e. requires pyridoxal phosphate

7-Which of the following statement about galactosemia is correct?

a. treatment involves restriction of glucose in the diet
b. A deficiency of glucokinase is the major cause
c. is treated by elimination of galactose from the diet
d. can be treated by restricting sucrose in the diet
e. is inherited as autosomal dominant character

8-Fatty acid oxidation is a significant source of energy in all of the following except?

a. liver
b. kidney
c. Red blood cell
d. Heart
e. Skeletal muscle

9-Lipoprotein lipase?

a. hydrolysis cholesteryl ester
b. is present in the cytosol of adipocytes
c. is active during starvation
d. hydrolysis TAG in chylomicrons
e. is activated by glucagon

10-The following are purine nucleotides?

a. CTP and GDP
b. NAD and TDP
c. ATP and CMP
d. GMP and ADP
e. UDP and GTP

11-Waston and crick model of DNA structure implied that:

a. Thymine base pairs with adenine
b. Thymine base paires with cytosine
c. DNA is a single strand
d. The purine content is not equal to the pyrimidine content
e. The nitrogenous bases from the backbone of the molecule

12-The bonds that stabilize the structure of DNA are:

a. hydrogen bonds and peptide bonds
b. phosphodiester bonds and hydrogen bonds
c. glycosidic bonds and thioester bonds
d. Disulphate bonds and hydrogen bonds
e. Van der waals forces

13-Lactic acidosis caused by deficiency of?

a. thymine
b. B1
c. folic acid
d. Biotin

14-During prolonged fasting?

a. B-Oxidation of fatty acid is initiated
b. glycogenesis is very active
c. blood glucose level is maximum
d. ketogenesis is maximum
e. bicarbonate is high in the blood

15 Arachidonic acid?

a. is branched fatty acid
b. contains 3 double bond
c. is a precursor for eicosanoids

d. contain 5 double bonds
e. is a20-carbon saturated fatty acid

16- fragile X syndrome?

a. X-linked dominant
b. Autosomal domininant
c. Autosomal recessive

17-All the following are ketogenic except?

a. Lysine
b. Leucine
c. Valine
d. Tyrosin
e. Tryptophan

Anatomy

1-The dermatomes of inguinal region?

a. T1
b. T12
c. L1
d. L2
e. T10

2-L5 land marke?

a. pubic tubercle
b. intertubercular line
c. transpyloric
d. iliac crest

3-Ovaries are anchored to the lateral pelvic wall by the?

a. ovarialigment
b. broud ligament
c. suspensory ligament
d. mesovarium
e. round ligament

4-7 yrs child with palpable and tender inguinal lymph node.the most cause is

a. big toe truma
b. truma in external genetalia
c. back pain

5-Surgion during abdominal surgery defined the affected area that characterized by tenia coli and formed the omentum hanging down from it. This is?

a. transfers colon
b. descending colon
c. sigmoid colon
d. ileum
e. jujenum

6-Male urethra is different from female urethra by?

a. there is external valve
b. there is internal valve
c. exhibition to infection
d. exhibition to stricture
e. easy cathetarize

7-What is the land mark muscle of gluteal region?

a. obturater externa
b. piriformis
c. obturater internus

8-The prostate gland is homologenous in female which structure?

a. bartholins gland
b. paraurethral gland
c. gartners duct
d. vestibular bulb
e. epoophoron

9-The fallopian tubes origin from?

a. gonad
b. mesonephric duct
c. paramesonephric duct
d. urogenital sinus
e. gubernaculum

10-Concerning the ureter, one is correct?

a. it enter the false pelvis anterior to bifurcation of common iliac artery
b. the ureter inter the bladder by passing directly through it is wall
c. it related to ischial spine before turning medially toward the uterus
d. blood supply of the proximal ureter is from superior vesical artery

11- Abdominal incision duringC/S (Pfannenstiel)?

a. skin,superficial fascia,deep fascia,rectus sheeth,peritoneum
b. skin,superficial fascia,scarpfascia,rectus sheeth,rectus abdominus,peritoneum
c. skin,scarpa fascia,camper fascia,deep fascia,rectus sheeth,peritonium

Microbiology

1-Patient of V.leshmaniasis . the signs of this patein is ?

a. leucopenia
b. thrombocytopenia
c. Anemia
d. intermittent fever
e. pancytopenia

2-The pathophysiology of cerebral malaria?

a. hyperparasytemia
b. enzymatic change
c. cytoadhesion
d. massive hemolysis

3-Sudanese child suffering from flatulence and fatty stool. What is your diagnosis?

a. Trichuriasis
b. Giardiasis
c. Amoebiasis
d. Ascariasis
e. Taeniasis

4-A pateint excreted a chain of short broad segment . what is the diagnosis?

a. T.Saginata
b. D.medinesis
c. H.nana
d. T.solium
e. E.granulosus

5-Old patient complaining of ocular pain with signs of corneal ulceration. What is the most likely causative agent?

a. Loa Loa
b. O.volvulus
c. I.belli
d. Naegeria fowleri
e. Acanthamoaba

6-Adult female patient coughed up larvae with sputum.Name this orgaism?

a. E.vermicularis
b. T.trichiura
c. S.stercoralis
d. T.saginata
e. P.westemani

7-The following disease cause huge splenomegaly?

a. severe melaria
b. V.leshmaniasis
c. brucellosis

8-Wet ulcer caused by?

a. L.donophani
b. L.tropica
c. L.mexican

9-HIV attach to CD4 with?

a. Reverse transcriptase
b. cell membrane progrestion
c. P120

10-Terminal spine in shistosmiasis in stool ?

a. S.heamatopium
b. S.mansoni

11-Type of malaria affect old RBCS"?

a. falciparum
b. vivax
c. malaria
d. vivax and malerae

12-The organism cause intestinal obtruction?

a. ascaris lumbricoides
b. Tenia saginata
c. Diphyllobothrium latum
d. Enterobius vermicularis
e. Ancylostoma duodenale

13-The following organism cause obstructive jaundice in china?

a. Clonorchis.sinensis
b. S.mansomi
c. S.japonicum
d. S:hematobium
e. P.westermani

14-Cube shaped capsid is associated with?

a. enveloped virus
b. non enveloped virus
c. icosahedral virus
d. helical virus

15-Organism length more than 6m.these organism is ?

a. Ancylostoma
b. Trichuris
c. Ascaris lumbricoids
d. Onchocerca
e. Wechereria

17-Recurrent malaria seen in?

a. p.falciparum
b. falciparum and vivax
c. vivax
d. malaria

18-Patient has susceptible to malaria increase by?

a. sickle cell anemia
b. duffy antigen
c. G6P dificency
d. thalassemia
e. Hemoglobin E

Pharmacology

1-Pregnant women complain with headache . take one tab of ibuprofen . this agent can cause?

a. close ductus atreriosus
b. single dose of NSAID no effect

2-The treatment of cerebral malaria is?

a. artusnate
b. quinine
c. artemether
d. qourtum
e. cloroquine

3-Patient lady come to hospital with high BP\220\110.take antihypertensive then develop headache and confusion.this agent is?

a. nifidipne
b. losartan
c. nitroperusside
d. candestan
e. labetalol

4-Pregnant lady came to hospital with UTi the physian take patient sulfanimide and trimethoprim. This agent can cause:

a. tooth discoloration
b. kernicterus
c. this agent is best to treat UTIwith pregnancy

5-A drug binds to areceptor and produces a biological response that mimics the response to the endogenous ligand, it is known as?

a. antagonists
b. agonists
c. functional antagonism
d. partial agonist

6-Patients come to ER after motor cycle trauma.patient receive dopamine ,the benefit of dopamine is ?

a. raised blood pressure
b. sustain hypotention
c. increase HR

7-The following drug use as tocolytics

a. Metaproterenol
b. Terbutaline
c. phenylephrine
d. clonidine
e. amphetamine

8-Medical student come to hospital diagnose as sinusitis , receive antihistamin,then student sleep in anatomy lecture,these agent is?

a. Diphenhydramine
b. Chlorpheniramine
c. Promethazine

9-patient known case of CHF,CAME TO ER complaining with lower limp edema-take diuretic drug-after 2 day patient develop ringing of ear,the drug cause these sign?

a. spironolactone
b. mannitol
c. Frusemide

d. acetazolamide

Statistics

1-Which of the following is correct?

a. A large sample size always ensure that our sample size is accurate and precise
b. in random samples the randomization ensure that stimate
c. we do not need to randomize if our sample size is sufficiency enogh
d. if all other things are equal,we need alarger sample size
e. in a properly chosen sample, an estimate will be less and more precise

2-In statistic the measurement used for comparison between 2 or more group and measured in different unit?

a. Mode
b. Coeficent
c. t test
d. z test
e. analysis of variance(ANOVA)

3-2group of patients followed forperiod of 10 yrs ,type of study?

a. Cohort study
b. Cross sectional study
